TO,

Mayer Feld Consulting,

Rahel-Hirsch-Straße 10 10557 Berlin, Germany,

Dear Hiring Team ,

I am writing to formally express my enthusiastic interest in the Data Analyst Intern position at Mayer Feld Consulting. Currently pursuing a Bachelor of Computer Applications with a specialization in Data Science at Sri Balaji University, Pune, India .I am eager to bridge the gap between academic theory and the practical, decision-oriented analysis your firm champions. Your emphasis on transforming "imperfect data" into structured insights resonates with my hands-on experience as a Data Analyst Intern at Code First Technology. During that tenure, I specialized in exploratory data analysis (EDA) and feature engineering, specifically addressing data inconsistencies and null values to ensure model reliability. I am comfortable navigating the complexities of messy datasets and understand that responsible communication of data limitations is just as vital as the analysis itself.

My technical and analytical background is built on a foundation of rigorous data transformation and visualization. I am proficient in using Power Query Editor for cleansing and merging data and have experience designing comprehensive dashboards for performance tracking. This is supported by strong technical proficiency in Python, SQL, and R, along with extensive experience using libraries such as Pandas, NumPy, and Scikit-learn to build predictive models. Furthermore, I have applied these skills to develop real-world projects, including a regression-based salary predictor and a content-based movie recommendation engine utilizing NLP. My analytical rigor is reflected in my academic performance, maintaining a CGPA of 9.20, and is supplemented by professional certifications in Python for Data Science from IBM and comprehensive data science bootcamps.

Beyond the numbers, my background as a musician, songwriter, and producer has honed my ability to communicate complex themes clearly and creatively—a skill I look forward to applying when translating analytical findings for non-technical audiences. Having collaborated in various college committees and being a multi-instrumentalist, I am well-prepared for the asynchronous, collaborative nature of your international team. I am particularly drawn to Mayer Feld Consulting because of your focus on how analysis supports real-world decisions.

I am eager to contribute my technical skills and my curious, detail-oriented mindset to your team. Thank you for your time and consideration; I look forward to the possibility of discussing how my background in data science and my dedication to continuous learning can support your upcoming consulting projects.

Sincerely,

Ritika Gupta
